STUDENT FEEDBACK OF INTERNSHIP

Student Name: Khushi Narendra Atara **Date:** 25/04/2026

Work Supervisor: Ashly M. Benny **Title:** Contractor, CPO L&D

Supervisor Email: Ashly.BennyM@cognizant.com **Internship is:** Paid

Company/Organization: Cognizant Technology Solutions

Internship Address: Siruseri SIPCOT IT Park, Chennai, Tamil Nadu – 603103

Faculty Coordinator: Dr. Prachi Palsodkar **Department:** EE

Was your internship experience related to your major area of study?

Yes, to a large degree ✓ **Yes, to a slight degree** **No, not related at all**

This experience has:	Strongly Agree	Agree	No Opinion	Disagree	Strongly Disagree
Given me the opportunity to explore a career field	✓				
Allowed me to apply classroom theory to practice	✓				
Helped me develop my decision-making and problem-solving skills	✓				
Expanded my knowledge about the work world prior to permanent	✓				
Helped me develop my written and oral communication skills	✓				
Provided a chance to use leadership skills (influence others, develop ideas with others, stimulate decision-making and action)	✓				
This experience has:	Strongly Agree	Agree	No Opinion	Disagree	Strongly Disagree
Expanded my sensitivity to the ethical implications of the work	✓

Department of Electronics Engineering

Made it possible for me to be more confident in new situations	✓				
Given me a chance to improve my interpersonal skills	✓				
Helped me learn to handle responsibility and use my time	✓				
Helped me discover new aspects of myself that I didn't know existed	✓				
Helped me develop new interests and abilities	✓				
Helped me clarify my career goals	✓				
Provided me with contacts which may lead to future employment	✓				
Allowed me to acquire information and/ or use equipment not available at my Institute	✓				

- In the Institute internship program, faculty members are expected to be mentors for students. Do you feel that your faculty coordinator served such a function? Why or why not?

  Yes, Dr. Yogesh Suryawanshi served as an excellent mentor throughout the internship. He provided timely guidance on project direction, helped bridge the gap between academic concepts and industry requirements, and was always available to address queries. His mentorship ensured that the internship objectives were clearly understood and met.

- How well were you able to accomplish the initial goals, tasks and new skills that were set down in your learning contract? In what ways were you able to take a new direction or expand beyond your contract? Why were some goals not accomplished adequately?

  I was able to accomplish all the initial goals set in the learning contract. The automation of the Coursera web application was completed successfully, covering all three tasks. Beyond the contract, I gained additional exposure to BDD Cucumber framework, API automation using REST Assured, and CI/CD integration using Jenkins and GitHub, which were not originally part of my core expectations.

Department of Electronics Engineering

- In what areas did you most develop and improve?

  I developed most significantly in Selenium WebDriver automation, Java programming, BDD Cucumber framework implementation, and test reporting using ExtentReports. I also improved considerably in understanding the Agile/Scrum methodology, working with JIRA for sprint and defect management, and applying the Page Object Model design pattern to build scalable automation frameworks.

- What has been the most significant accomplishment or satisfying moment of your internship?

  The most satisfying moment was the successful execution of the Hackathon project, where I automated three complex workflows on the Coursera platform and generated a professional ExtentReport showing all tests passing. Seeing the browser automate form filling, extract data from dropdowns, and capture validation error messages exactly as designed was a deeply rewarding experience that validated all the learning from the 65-day program.

- What did you dislike about the internship?

  The internship was largely a positive experience. The only minor challenge was the fast-paced learning schedule, which at times made it difficult to thoroughly revise earlier topics before moving to advanced ones. Additionally, setting up the local development environment with all required software versions initially took time and caused minor delays in starting the hands-on exercises.

- Considering your overall experience, how would you rate this internship? (Circle one). (Satisfactory/ Good/ Excellent)

  Rating: EXCELLENT

- Give suggestions as to how your internship experience could have been improved.

  The internship was an excellent and well-structured experience overall. A few minor improvements could make it even better. A pre-internship orientation session for tool installation and environment setup would save valuable learning time in the initial days. More frequent one-on-one mentoring sessions with the industry supervisor during the early weeks

would help interns align with project expectations more quickly. Additionally, providing recorded ILT session videos for later reference would make revision and concept reinforcement much more convenient during project work.
